### **C. Rejection of Claims under 35 U.S.C. §112**

#### **Office Action**

The Office Action states that adequate written description and adequate enablement do not exist in the instant application for all possible hyperactive reverse transcriptases comprising one or more point mutations. Office Action at pages 2-7.

#### **Response**

Pending claims have been amended to recite point mutations at H638 or F155. Applicants, therefore, respectfully request that the rejection under 35 U.S.C. §112 be withdrawn.

**D. Rejection of Claims under 35 U.S.C. § 102(b)**

Claims 46, 47, 49, 50, 57, 58, 86-96, 127 and 128 were rejected as anticipated by Gao *et al.* U.S. Patent No. 6,136,582.

**Response**

Claims 46, 47, 49, 50, 57, and 58 are cancelled.

To anticipate a claim, each and every element of the claim must be found in a single prior art reference. MPEP § 2131.

Independent Claim 86 has been amended to depend from Claim 1, which claim was not subject to this rejection. Therefore, amended Claim 86 is not anticipated by Gao *et al.* Independent Claim 127 has been amended to recite the point mutation H638G. Gao *et al.* do not teach or suggest a point mutation at amino acid 638. Therefore, Gao *et al.* cannot anticipate Claim 127, or Claim 128 which claim is dependent upon Claim 127.

Applicants respectfully request withdrawal of the rejection over Gao *et al.*

**E. Conclusion**

Applicants believe that the foregoing remarks fully respond to all outstanding matters for this application. Applicants respectfully request reconsideration of the claimed invention.
